## **Consent for Use or Disclosure of Health Information**

**The effective date of this privacy notice is April 14, 2003**

### **Our Privacy Pledge**

We are very concerned with protecting your privacy. While the law requires us to give you this disclosure, please understand that we have, and always will, respect the privacy of your health information.

There are several circumstances in which we may have to use or disclose your health care information.

- We may have to disclose your health information to another health care provider or a hospital if it is necessary to refer you to them for the diagnosis, assessment, or treatment of your health condition.
- We may have to disclose your health information and billing records to another party if they are potentially responsible for the payment of your services.
- We may need to use your health information within our practice for quality control or other operational purposes.

We have a more complete notice that provides a detailed description of how your health information may be used or disclosed. You have the right to review that notice before you sign this consent form (§ 164.520). We reserve the right to change our privacy practices as described in that notice. If we make a change to our privacy practices, we will notify you in writing when you come in for treatment or by mail. Please feel free to call us at any time for a copy of our privacy notices.

### **Your right to limit uses or disclosures**

You have the right to request that we do not disclose your health information to specific individuals, companies, or organizations. If you would like to place any restrictions on the use or disclosure of your health information, please let us know in writing. We are not required to agree to your restrictions. However, if we agree with your restrictions, the restriction is binding on us.

### **Your right to revoke your authorization**

You may revoke your consent to us at any time; however, your revocation must be in writing. We will not be able to honor your revocation request if we have already released your health information before we receive your request to revoke your authorization. If you were required to give your authorization as a condition of obtaining insurance, the insurance company may have a right to your health information if they decide to contest any of your claims.

I have read your consent policy and agree to its terms. I am also acknowledging that I have received a copy of this notice.

## ***INFORMED CONSENT TO CHIROPRACTIC TREATMENT***

The nature of chiropractic treatment: The doctor will use his hands or a mechanical device in order to move your joints. You may feel a “click” or “pop”, such as the noise when a knuckle is “cracked”, and you may feel movement of the joint. Various ancillary procedures, such as hot or cold packs, electric muscle stimulation, therapeutic ultrasound or dry hydrotherapy may also be used.

Possible Risks: As with any health care procedure, complications are possible following a chiropractic manipulation. Complications could include fractures of bone, muscular strain, ligamentous sprain, dislocations of joints, or injury to intervertebral discs, nerves or spinal cord. Cerebrovascular injury or stroke could occur upon severe injury to arteries of the neck. A minority of patients may notice stiffness or soreness after the first few days of treatment. The ancillary procedures could produce skin irritation, burns or minor complications.

Probability of risks occurring: The risks of complications due to chiropractic treatment have been described as “rare”, about as often as complications are seen from the taking of a single aspirin tablet. The risk of cerebrovascular injury or stroke, has been estimated at one in one million to one in twenty million, and can be even further reduced by screening procedures. The probability of adverse reaction due to ancillary procedures is also considered “rare”.

Other treatment options which could be considered may include the following:

- *Over-the-counter analgesics.* The risks of these medications include irritation to stomach, liver and kidneys, and other side effects in a significant number of cases.
- *Medical care,* typically anti-inflammatory drugs, tranquilizers, and analgesics. Risks of these drugs include a multitude of undesirable side effects and patient dependence in a significant number of cases.
- *Hospitalization* in conjunction with medical care adds risk of exposure to virulent communicable disease in a significant number of cases.

*Surgery* with medical care adds the risks of adverse reaction to anesthesia, as well as an extended convalescent period in a significant number of cases.

Risks of remaining untreated: Delay of treatment allows formation of adhesions, scar tissue and other degenerative changes. These changes can further reduce skeletal mobility, and include chronic pain cycles. It is quite probable that delay of treatment will complicate the condition and make future rehabilitation more difficult.

Unusual risks: I have read the explanation above of chiropractic treatment. I have had the opportunity to have any questions answered to my satisfaction. I have fully evaluated the risks and benefits of undergoing treatment. I have freely decided to undergo the recommended treatment, and hereby give my full consent to treatment.
